Profile Summary

Software Engineer & Evangelist with experience in mobile app development (Flutter, Kotlin), backend engineering (Firebase, Node.js), and interest in AI integration. Visionary and optimistic, passionate about building impactful software solutions and evangelizing the Word of God.

Education

- Jimma University – B.Sc. in Software Engineering (Jan 2023 – Aug 2027)
- Leadstar Christian University – B.A. in Theology/Theological Studies (Jan 2023 – Present)

Experience

- Prodigy InfoTech – Software Engineer (Apr 2025 – Aug 2025)
- Prodigy InfoTech – Mobile App Developer (Apr 2025 – May 2025)
- Alpha Intern – Mobile Developer (Jul 2025 – Aug 2025)
- Jimma University – Student (Sep 2022 – Present)
- Leadstar Christian University – Student (Jan 2023 – Present)

Skills

- Languages: Dart, Kotlin, Java, PHP, JavaScript, TypeScript
- Frameworks/Tools: Flutter, Node.js, Firebase, GetX, React
- Other: Clean Architecture, REST APIs, Distributed Systems

Projects

- Oro Chat App – Chat application built with Flutter, GetX, and Firebase backend, featuring clean architecture, audio call support, and real-time chat.
- Ethiopian Ride-Sharing App – Supports bajaj, taxi, and minibus services with GPS tracking, offline/digital payments, emergency support, and job creation.
- Employee Attendance Management System – Mobile app with admin approval, attendance tracking, and monthly bar graph analytics.
- KG School Management System – Web app for kindergarten school, managing students, staff, and records.
- El-Roi Bible School Website – Responsive, scrollable website with diploma, degree, MA, and PhD program details using HTML, CSS animations, and JavaScript.
- Birth, Death & Marriage Certificate System – Web-based admin dashboard in HTML, CSS, PHP for managing certificate records.
- TenaMirt App – A choir-focused single app including students from elementary to university level.
- Portfolio Projects – Multiple responsive websites and mobile apps built with Flutter, Firebase, and PHP.

Vision

To found the first major mobile app software company in Ethiopia, integrate AI into mobile solutions, and become an influential leader while continuing evangelism.
